TABLE OF CONTENTS

RESOLUTION OF THE CITY COUNCIL.

[Approved January 3, 1878.]

Resolved, That the City Engineer, acting under the advice of the Joint Committee on Public Works, be directed to cause an Index of the records of births, marriages, divorces, and adoptions, and the said committee is hereby authorized to cause the same to be printed.

PREFACE.

This is the *Fourth Volume* of a series, making "AN ALPHABETICAL INDEX OF THE BIRTHS, MARRIAGES, AND DEATHS, RECORDED IN PROVIDENCE, R. I."

The First Volume contained the name and other particulars, of every person whose *birth, marriage, or death* is recorded in Providence, from 1633 to 1850 inclusive.

The Second Volume contained the name of every person whose *Marriage* is recorded in Providence, during the twenty years from 1851 to 1870 inclusive.

The Third Volume contained the name of every person whose *Death* is recorded in Providence, during the same twenty years, from 1851 to 1870 inclusive.

This, *the Fourth Volume*, contains the name of every child whose *Birth* is recorded, during the same period of twenty years, from 1851 to 1870 inclusive.

This volume contains 29,768 names of children whose births are recorded in the records of births in Providence, in volumes VI, VII, and VIII, and ending with page 166, in volume IX.

All the children whose names are found in this volume, with two exceptions, were born between January 1, 1851, and December 31, 1870, inclusive.

A *Fifth Volume*, containing the *Marriages* recorded during the ten years, from 1871 to 1880 inclusive, is nearly ready for the printer.

In 1851 and 1852, the first two years included in this volume, the records of births in Providence were very incomplete, including only those that could be obtained by reports from physicians; 1853, and in 1854 an effort was made to obtain more full returns by an annual house to house census. Since the office of City Registrar was established, in 1855, the returns of births have been obtained by a semi-annual census, from house to house, in January and July of each year. Much effort has constantly been made to obtain the returns of all the births in the city, and also to make the particulars of each as correct and complete as possible. While experience has shown, that on account of removals and other causes, an annual or semi-annual census alone cannot obtain absolutely complete returns of births, there is no doubt that the returns in Providence have been fully as complete as those of any other city in this country.

The following table shows the number of births recorded, that occurred in Provi-

dence, in each of the twenty years, from 1851 to 1870 inclusive. One birth is also included that took place in 1850. The whole number, 29,768, is the number of names contained in this volume:

Year.	No. of Births.	Year.	No. of Births.	Year.	No. of Births.
1850, - - - -	1	1857, - - - -	1,685	1864, - - - -	1,749
1851, - - - -	52	1858, - - - -	1,714	1865, - - - -	1,737
1852, - - - -	782	1859, - - - -	1,581	1866, - - - -	1,640
1853, - - - -	1,117	1860, - - - -	1,647	1867, - - - -	1,652
1854, - - - -	1,351	1861, - - - -	1,726	1868, - - - -	1,889
1855, - - - -	1,703	1862, - - - -	1,533	1869, - - - -	1,821
1856, - - - -	1,340	1863, - - - -	1,703	1870, - - - -	1,908
Total whole period, - - - - -					29,768

The number of births given for each year is sometimes larger than the number of births reported in the City Registrar's Reports. The reason is that in furnishing certificates of record of births for pension purposes, during and after the war of the rebellion, a considerable number of births were recorded, which had been omitted in the earlier years of this record.

In the preparation of this Index, many corrections and additions have been made in dates, names, &c., from comparison with the records of deaths, and with the census of population. These changes will not always be found on the records, so that, actually, in a considerable number of cases, this Index will be found to be more full and complete than the records themselves.

A table is given at the close of this volume, showing the "Number of Names in this book under each letter of the Alphabet." A list is also given of "Family Names spelled in different ways," as found in this volume.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is crucial for ensuring the integrity of the financial statements and for providing a clear audit trail. The text notes that any discrepancies or errors in the records can lead to significant complications during an audit and may result in legal consequences for the organization.

2. The second part of the document outlines the specific procedures that should be followed when recording transactions. It details the steps from the initial receipt of a document to the final entry in the accounting system. This includes instructions on how to verify the accuracy of the information provided, how to handle any missing or incomplete data, and how to ensure that all entries are properly classified and coded according to the organization's chart of accounts.

3. The third part of the document addresses the issue of reconciling the records. It explains that regular reconciliations are necessary to identify and correct any errors or omissions in the records. The text provides a step-by-step guide for performing these reconciliations, including how to compare the records against bank statements, vendor invoices, and other external documents. It also discusses the importance of documenting any adjustments made during the reconciliation process.

4. The final part of the document discusses the role of the accounting department in providing accurate and timely information to management. It highlights that the accounting team is responsible for analyzing the data and providing insights into the organization's financial performance. This includes preparing financial statements, budget reports, and other key performance indicators that are used by management to make strategic decisions. The text concludes by emphasizing the importance of communication and collaboration between the accounting department and other parts of the organization to ensure that all financial information is accurate and up-to-date.
